

AdBlue® System Pressure Test Kit

Information

- This tool measures the system pressure.
- This kit is designed to test the system pressure effectively, keeping the engine healthy and running.
- Set Includes 2 x clear braided connection pipes 300mm clear braided connection pipes.
- Pipes have 90° & straight angled connectors for access to the exhaust system.
- Pressure testing gauge also included.

Precautions

Always wear safety gear.
Working in a clean and safe environment.
This task should be carried out by trained personnel.
Make sure to consult manufacturers manual.
Do NOT use with air tools.

Instructions

Step 1

- Ensure the engine is cool and the car is parked on dry ground.
- Make sure the cooling system has enough water before you begin the test. Refill if necessary.

Step 2

- Check for pressure in the system by holding the upper radiator hose and push your thumb in. If there is no or little pressure, move onto the next step.

Step 3

- Attach the pressure tester to a pressure testing pump. Select the appropriate pipe from the kit and attach it to the pressure tester. Connect the pipe to the radiator cap. Some vehicles may require an adaptor for connecting to the radiator cap.

Step 4

- Slowly apply pressure using the pump up to the range of the system or the range indicated on the radiator cap. Avoid building too much pressure as this may damage the system. The reading on the pressure tester will change as it detects the pressure building up. The system should hold pressure for two minutes. If it does not, check for leaks.

Step 5

- When finished, remove the pressure tester slowly. It is normal that water might cover the connector at this stage. Clean the tester properly before storing away.

Warranty

If you are unsure on how to use the item please contact us. If it were to fail due to a manufacturing fault or poor workmanship we will repair or replace it. Please contact your local dealer in the event you need to send the item back. You can also make a repair/replacement request on our website and download & complete the form online. Normal wear and tear along with misuse will void any warranty. Consumables are not covered under warranty.
