Art. 4956-WW

Information

- The Welzh Injector adaptor is specially designed to be used with Welzh Vibration Mate [4589-WW] for removing Ford EcoBlue diesel injectors in one piece.
- Previously, the EcoBlue injectors could only be removed if the fuel return connection and Piezo head were removed by breaking them off; rendering the injector unusable. This kit allows these injectors to be pulled out without needing to break the injector first.
- It extracts diesel injectors in one piece; allowing them to be refitted.

Safety First

- Only operate if trained to do so.
- Read these instructions carefully and retain for future reference.
- Ensure the vehicle is properly supported with the wheels secured, in line with manufacturer's guidelines.
- Wear safety apparel while operating and keep hands away from moving parts.

Instructions

- The arrow indicate direction where the pulling tool must be inserted, otherwise the thread will be damaged.

- To assemble insert the adaptor as shown on the picture.

- There are two plates:
- Plate A with a thread
 - Plate B without a thread

- After fitting the injector, insert the screw bolt to the hole on plate B (without thread).
- Do not insert into the hole in plate A otherwise it will damage the thread.

- At this stage the injector can be pulled.
